

when in

prague

a project that reflects the erasmus
experience through three graphic objects

- (N.º 1)  *the poster*
- (N.º 2)  *the tape*
- (N.º 3)  *the zine*

the poster is a self portrait, the tape reflects some of what I was listening to in the period of time the experience took place and the zine has some visual memories taken with my first analog camera, bought it Prague, that stopped working after the first roll used.

the poster acts as a self portrait
and the numbers in the face make
associations with the places
visited during the three months,
in cronological order.
